

In this fast changing world of Technology, there always more challenge and choice for user.. and that's the adoption of Opensource technology to enterprise. Understanding today's trend is one of the key factor to lead your business to success. Using right tools to navigate your business is the element to drive your competitive business to success. With the clear concept of 'no licensing' and 'Open System', more and more user accepting this idea and adopt them to business extremely fast. Cost factor is enterprise main concern in expanding IT where unlimited expansion of cost to purchase licensing is unbearable to large corporate.

With this ... Opensource become alternate solution.

We offer more on Server Application which allow user to use those application through Web Base. Our solution started from basic requirement such as Mail Solution, Web Solution to highly sophisticated solution such as Workflow or Document Management System. But what we proud the most is 'Advance Sales Force Automation' where we use our experience from highly complex business model, DHA Siamwalla Ltd to be our Model and Site Reference.

Not only solution counts. Our service become our main concern which drive us to set Level of Service where very few company in Thailand can provide such level of service. Because we strongly feel the importance of Service, we invested a lot guarantee customer satisfaction.

We provide Solutions and Services that fit your company started from Basic Infrastructure to highly sophisticated system. Believe it or not... we can give you Optimize Open Source Solution.....you need.

FRAMEWORK

Solution 1 : I Base Infrastructure

ICE Solution carefully design our System and Application according to 'Single Sign On' Concept which right now widely adopt in Corporate IT Infrastructure.

Started from Basic IT Infrastructure which we offer Quality Server bundle with Linux Operating System. We provide with each layer a high quality product from Firewall, Mail Service, Web Service, Application&Database Service which neatly integrate each service with easy to use Central Administration.

Not only that, ICE Solution also do all ground work in designing and reviewing your IT Infrastructure to make sure that our customer gain the most. We design all Network&Hardware Infrastructure for our client. We also works with our partners to strengthen our solution and service to our customer.

Solution 2 : Intranet

From basic needs of each corporate to have strong mean of communication, we provide 'Intranet Solution' to our client to enable basic corporate knowledge base. The application provided are

Corporate News : Application where any staff can view corporate announcement internally.

Download : Application where it help you store Program, File, Document in center.

FAQ : Application where it help user to post and search frequent asked question within the system.

Gallery : An application where customer can manage Corporate file server.

Submit News : An application where user can post their own Information to Public with inspection from Administrator. And more.....

Solution 3 : Office Automation

Having collaboration in your company is Management's dream. We provide group schedule, To do List, Central Addressbook where Corporate e-mail address or personal address can be search through this application. By having group application like this, corporate staff can enjoy communicating with other more efficiently.

Solution

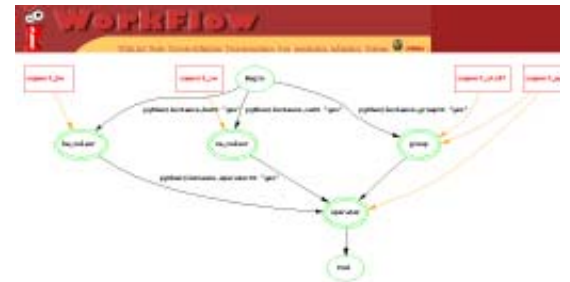

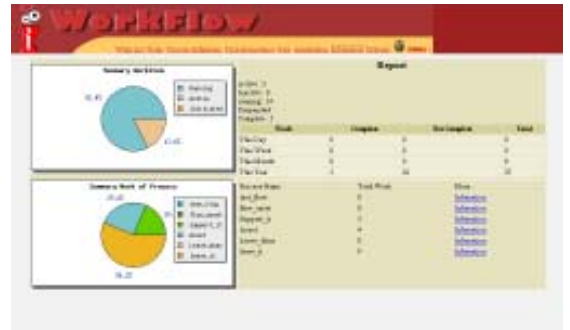

Solution 4 : Workflow

Workflow is now our product highlight where customer can split their development into 2 parts where our staff will identify

1. Business Logic and flows where we need to define flow of activity
2. Application which represent manual operation.

And these are their feature

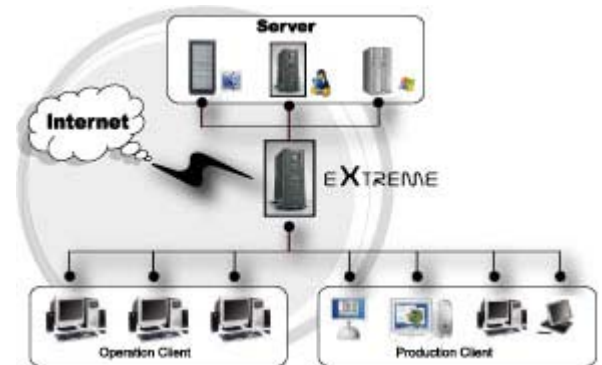

1. This application provide Process Monitoring where no other application can provide this feature.
2. This application help in designing and modifying Business Logic.
3. Provide the capability to provide KPI functionality.
4. Gear management to control corporate procedure which suit ISO9000 Series
5. Process review by Enterprise Management.
6. And many more.....

Solution 5 : Extreme Solution

Extreme is our proud product where our feature match Brand name product such as MacIntosh. And these are summarize feature:-

1. High Capacity Storage area started from 140 GB to 1.5 Terabyte. This allow company to store digital media in central Server. This prevent data loss from CD
2. Security where we carefully think of copy-right image. Not everybody can access those space.
3. Digital Gallery where our customer can browse multimedia from Browser.
4. Capability to build connectivity between Macintosh, Linux, WindowsOS without connecting through PC MacLan this gives us more advantage because customer doesn't have to buy 'PCMaclan' which required 1 to 1 License.
5. System Stability where we focus mainly in Hardware which has redundant power supply, harddisk and/or RAM
6. and Many more...
